Our daughter Molly was born at 29 weeks weighing 2 lbs 12 ounces, and after just over 2 months in Yale's Newborn Intensive Care Unit (NICU), she was able to come home. Today, Molly is a thriving 10 year old. Alicia's Angels was founded by one of Molly's NICU nurses in honor of her late daughter who didn't get to come home. The organization is a 501c(3) not for profit and is placing rooms in NICUs which will create an environment more like a home and less like a hospital. The mission of Alicia's Angels is "To Bring Home to the Babies Who Will Not Get to Make It Home"
